Summary

Full-stack software engineer (backend-leaning) with 3+ years of building enterprise software, from the data model to customer deployment. Co-founded Pivotr and built core modules of its ERP, Aria; shipped 30+ customer deployments across 2 companies.

Experience

Pivotr Bengaluru, India
Co-founder & Software Engineer June 2025 – September 2026

- Architected and delivered 2 core ERP modules, Asset Management and Inventory Management, with APIs, relational data models, and enterprise workflows in TypeScript, Next.js, NestJS, Prisma, and PostgreSQL.
- Built Aria's shared platform: authentication, CI/CD pipelines, Docker and Caddy deployment, and a Windows installer.
- Delivered 12 Asset Management deployments across customer environments, owning configuration, rollout, and post-deployment support.

Getin Solutions Bengaluru, India
Software Developer June 2023 – May 2025

- Developed and deployed 2 enterprise applications for manufacturing customers, an HRMS and a production-operations system, using Angular, Django, and PostgreSQL.
- Delivered 20+ customer deployments across both products, covering configuration, testing, rollout, and post-production support.
- Engineered a shift-recognition algorithm for 3 shift models (Fixed, Rotational, and Auto Shift) from real-time attendance data, including shifts that span calendar days.

Projects

workclock | workclock.karthik.nz September 2026 – Present

- Engineered a business-time arithmetic library (working hours, SLAs, shifts, holidays, time zones) with a Rust core and Python and JavaScript bindings, published on crates.io, PyPI, and npm.
- Wrote a migration guide and compatibility layer for businesstimedelta users, plus a documentation site.

AI Job Resume Matcher | karthik.nz/work/job-matcher September 2026 – Present

- Created a self-hosted job matcher that scrapes job boards and scores each listing against a resume with an LLM, using Bun, NestJS, Next.js, Effect, PostgreSQL, BullMQ, and Docker.
- Implemented typed failure handling, idempotent runs, per-user advisory locks, and budget-aware scrape routing, backed by about 95 test files and CI.

Education

MVJ College of Engineering Bengaluru, India
Bachelor of Engineering, Mechanical Engineering 2022
Research: Presented a research paper at the Second International Conference on Materials and Technologies, 2022.

Skills

Programming: TypeScript, JavaScript, Python, SQL, Rust
Backend: NestJS, Node.js, Django, Django REST Framework, FastAPI, REST APIs, tRPC
Frontend: Next.js, React, Angular, Tailwind CSS
Data: PostgreSQL, Prisma, Redis, BullMQ, SQLite
DevOps & Tools: Docker, GitHub Actions, CI/CD, Turborepo, Caddy, Git, Linux
Language: Native English and Kannada, Fluent Hindi, Elementary Spanish, Conversational Telugu
Interests: Football, Running
